

JAMIS Provides Enterprise-Grade Data Protection Solutions for Govcon.

### **JAMIS Federal Cloud**

JAMIS Software Corporation, a leading provider of enterprise resource planning (ERP) software and secure cloud solutions, has successfully achieved FedRAMP Moderate Equivalency, after an assessment from Third-Party Assessment Organization (3PAO), Lunarline. With this designation, the JAMIS Prime ERP platform is now fully equipped to handle Controlled Unclassified Information (CUI), satisfying the stringent security requirements of the Federal Risk and Authorization Management Program (FedRAMP). This achievement also positions JAMIS to support customers in meeting Cybersecurity Maturity Model Certification (CMMC) Level 2 standards – critical for companies doing business with the U.S. Department of Defense. JAMIS is able to provide the complete Body of Evidence (BoE), key artifacts such as the System Security Plan (SSP), to prospective and current customers upon request.

### **JAMIS High Security Cloud Services**

- Managed Service on AWS GovCloud
- ✓ FedRAMP Moderate Compliant
- ✓ Facilitates CMMC Compliance
- ✓ Securely Store CUI Data

Continuous Monitoring

## **Cybersecurity Leadership You Can Trust**

- As cybersecurity regulations evolve, JAMIS has been aligned with FedRAMP and CMMC to position your business ahead of the curve
- JAMIS' history demonstrates its commitment to serve federal contractors, making it a trusted partner
- Choosing a cloud partner with these credentials gives you an edge when bidding for federal contracts and partnering with companies in the defense industrial base (DIB).
- ✓ Backed by a dedicated U.S.-based cybersecurity and infrastructure team with deep expertise in GovCon IT requirements
- ✓ Constantly evolving to meet the latest security threats not an afterthought or checkbox

### Compliance-as-a-Service

### Partnership with Project Hosts

- ✓ JAMIS has a partnership with Project Hosts to ensure compliance for JAMIS Prime ERP by leveraging their FedRAMP Authorized Platform as a Service (GSS One). This has allowed JAMIS to inherit security controls required to meet the compliance standards for FedRAMP Moderate. Project Hosts implements the most rigorous cloud security standards to support federal, critical infrastructure, state, and local government agencies and enterprises.
- Project Hosts environments hold certifications and authorizations from HITRUST, StateRAMP, FedRAMP, and the DoD.

#### **Compliance Management**

We do the heavy lifting —> our Compliance-as-a-Service includes creating a set of policies and procedures – including managing documentation and evidence collection such as a system security plan (SSP), shared responsibility matrix (SRM).

#### **Continuous Monitoring**

Operations and security teams monitor performance, SIEM (Security Information and Event Management) logs and alerts, prevent intrusions, and we provide the ongoing scanning and patching of your cloud environment.

# JAMIS Federal Cloud unlocks cloud compliance and innovation at scale

Built on Amazon Web Services (AWS) GovCloud, JAMIS Federal Cloud enables government contractors managing Controlled Unclassified Information (CUI) and sensitive data to modernize and innovate in the cloud.

# **Key Value**

- ✓ Purpose-built to power sensitive and regulated high-value, mission-critical data and workloads
- ✓ Inherit compliance controls to reduce operational overhead and accelerate time to workload authorization
- Scalability optimizes performance for various deployment patterns; balances availability, durability, performance, resiliency and cost
- ✓ Ability to achieve sustainability goals without sacrificing performance
- ✓ Suitable for born-in-the-cloud applications, migrated workloads and hybrid models

### Compliance

- ✓ FedRAMP Moderate Compliant
- ✓ Defense Federal Acquisition Regulation Supplement
- ✓ NIST SP 800-53 rev 4 (rev 5 coming soon) and SP 800-171
- ✓ Federal Information Processing Standard Pub 140.2
- ✓ International Traffic in Arms Regulation (ITAR)
- ▼ SSAE (Statements on Standards for Attestation Engagements) SOC (Service Organization Control) reports)

# AWS GovCloud (US) Regions

Designed for compliant infrastructure operations and flexible connectivity options at scale.

#### Infrastructure Operations

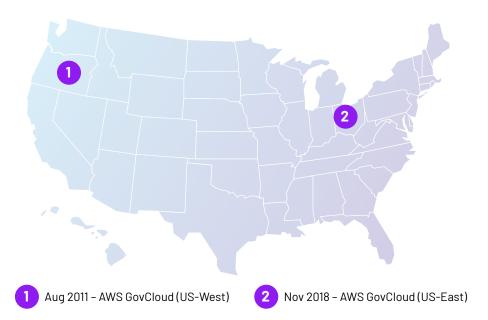

- ✓ Isolation of data, networks, and machines from other regions
- Situated within the United States
- ✓ Managed by citizens of the United States

#### **Connectivity Alternatives**

- ✓ VPN access through the Internet
- ✓ Direct Connect (DX) options
- ✓ Support for DoD Cloud Access Point (CAP) integration
- ✓ Assistance with Trusted Internet Connection (TIC) integration
- ✓ FIPS 140-2 compliant service endpoints

Isolated infrastructure and services to satisfy regulatory and compliance requirements for sensitive at hyper-scale

Architected for Resiliency Two Regions and Six total Availability Zones
