JAMIS Prime Distribution Management Suite

About JAMIS Prime

JAMIS Prime ERP is an intuitive cloud ERP solution for government contractors, offering integration across all key components of any business. Prime ERP leverages the cloud not only to connect with a mobile workforce, but with customers and other value chain businesses on web-enabled devices of every kind. This web-based software application provides government contractors with a compelling new option for financial management, business performance management, and DCAA compliance in today's competitive environment.

Features and Functionality

Purchasing Management

The Purchasing Management module automates a supply chain and reduces the cost of acquiring materials. JAMIS Prime ERP automates the entire procurement process—organizing vendor quotes, issuing purchase orders, receiving orders, creating AP vouchers, and analyzing results.

Requisition Management

The Requisition Management module allows businesses to organize and simplify the way you gather purchasing requests, obtain vendor bids, create quotes, approve quotes, manage purchases, and fulfill orders for internal or external clients. Integration with other JAMIS Prime ERP modules eliminates paperwork while providing sales, service, shipping, receiving, management, and others with visibility into the requisition process.

Inventory Management

The Inventory Management module provides real-time access to available inventory, inventory in transit, reorder quantities, and inventory costs, enabling businesses to efficiently manage the distribution process to improve customer satisfaction while maximizing profits. Inventory Management software is a key component of the Distribution Suite and is integrated with the Contract/Project Management Suite and the Purchasing Management module.

Sales Order Management

Optimize the way you quote, approve, and fulfill sales orders. Split orders across multiple warehouses, verify credit limits, issue replenishment orders, accept returns, and more.

JAMIS Corporate Headquarters : 4909 Murphy Canyon Rd., Suite 460 San Diego, CA 92123

JAMIS Prime Business Planning Suite

The Distribution Management Suite is designed to improve every aspect of the distribution process.

Web-based functionality integrates with JAMIS Prime to automate the distribution process. From managing the complexities of purchasing, ordering, tracking inventory, filling orders, and supporting customers to running real-time measurements and reports. It's proven functionality reduces errors in the purchasing and fulfillment process to deliver real-time measurements of all procurement activity across the entire organization.

JAMIS PRIME's Distribution Management Suite will help achieve:

- Compliance with the rules mandated by The Truth in Negotiations Act (TINA) (10 U.S.C. 2306a and 41 U.S.C. chapter 35), that requires contractors to submit certified cost or pricing data if a procurement exceeds the TINA threshold. With this Act, contractors must purchase supplies and services from responsible sources at fair and reasonable prices.

- Ensures organizations will pass an Contractor Purchasing System Review (CPSR).

- Reduces errors within purchasing, order fulfillment, inventor tracking, and customer support.

- Deploys processes through the entire supply chain and easily engages everyone within the organization through web-based functionality.
