

JAMIS Prime ERP Mobile App

94%

Within the next five years, smartphones, tablets and laptops will drive about 94 percent of web traffic.

"ERP software and mobile technologies are becoming more cost-effective and easier to deploy, causing the smaller and mid-market to catch up to their Fortune 500 counterparts. Gone are the days where a company needs millions of dollars to deploy new enterprise technologies, which will make ERP systems, CRM software and other business technologies more accessible."

- Panorama Consulting

74%

Global Mobile data traffic grew 74% in 2015

40%

40% of smartphone owners use mobile devices to look up government services and information.

Empowered Employees

Real-time access to information allows extensive access throughout the organization. Providing your staff with the ability access secure information anywhere, anytime, improves customer & partner engagement.

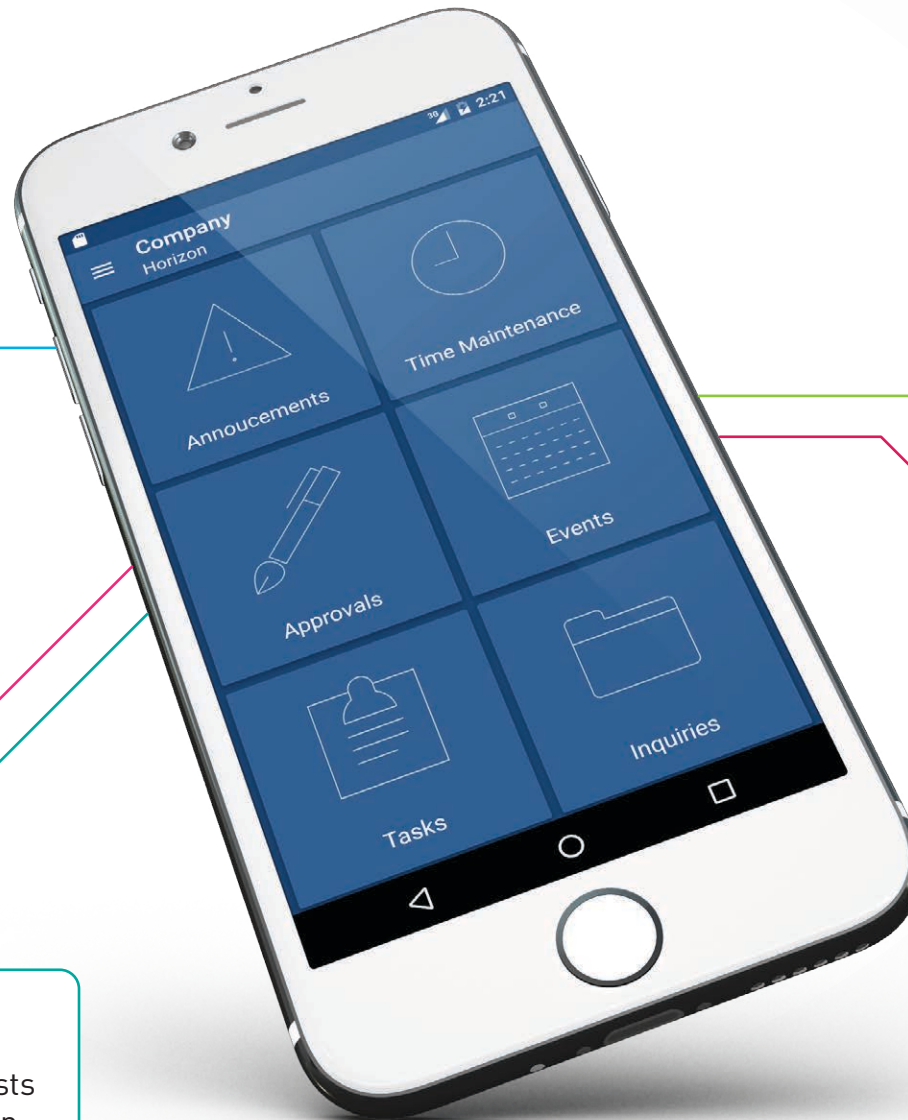

Tailored Experience

Customized role-based access offers a personalized user experience across any organization.

Manage Critical Functions on the Go

- Manage time sheets and time off requests
- View critical contract related information
- Approve requisitions or purchase orders
- Assign tasks and activities to employees

Competitive Advantage

The ability to deliver real-time information on-the-spot to retrieve custom KPI's to give you target insights into your business.

More Accurate Data Capture

Mobile ERP software makes it easy for workers to enter all relevant data accurately as they gather it in the field without re-keying the data into back-end systems. The system also uses the same business logic as core Prime application.
