

JAMIS TECHNICAL SERVICES

JAMIS Technical Services is a dedicated team of JAMIS Prime technical experts who focus on delivering custom reporting, business process automation, system personalization and customization, and system integration for your implementation of JAMIS Prime. JAMIS Technical Services works collaboratively with your organization to optimize your use of JAMIS Prime, enhance the existing system capabilities, recommend areas of improvement, and ensure you are getting the most out of your ERP solution. With JAMIS Technical Services you can maximize your investment in JAMIS Prime and realize more efficient and effective financial and business operations.

Custom Reporting

We work closely with your organization to understand specific reporting requirements and design customized reports that provide valuable insights into business performance, project progress, financials, and more. Our expertise in data analytics and visualization enables our clients to make data-driven decisions, optimize operations, and improve overall business performance.

System Integration

Take advantage of powerful system integration capabilities that enable seamless data flow and real-time information exchange between systems, eliminating manual data entry and reducing errors. Both scheduled batch-based file uploads and live web-services integration can be supported based on your requirements. Examples of 3rd-party system integrations include those with HR and Payroll systems, contract management systems, proposal systems, marketing systems, and project management systems.

Personalization & Customization

We provide both personalization and customization services to enhance your user's interaction with the system or tailor product functionality to your exact

needs. Examples of personalization range from modifying entry or processing forms to optimizing windows with side panels to eliminate clutter and get critical information in less clicks. Examples of customization include developing custom features, functionalities, and extensions within JAMIS to align with your business processes and requirements. Using personalization and customization services you can create a JAMIS Prime system tailored to your unique business needs, providing you with a competitive edge and maximizing your ROI.

Business Process Automation (BPA)

The JAMIS Technical Services team can automate notifications and tasks to streamline business processes and increase efficiency. In addition, they can create custom workflows so your JAMIS Prime system mirrors your exact business processes, procedures, and internal controls.
